Cloud Based Automated Data Governance Management System

Accelerate your Data Governance Program

By using COMPASS, Sandhill's Data Governance Management System™

Standardization Across the Enterprise

Easy to use and deploy

Manages the complexities of any DG Program

Increases Data Management Performance

Ensuring Enterprise Data meets current and future business requirements

COMPASS is a cloud based, automated Data Governance Knowledge & Management System, used for the rapid deployment, operation and analytics of an organization's strategic Data Governance Program for improving business performance.

COMPASS simplifies the control of your data assets and replaces labor intensive custom development of Data Governance programs which may not be responsive to today's velocity of business.

Sandhills COMPASS is a scalable, high performance and secure system that provides strategic guidance in a coherent, adaptive and efficient solution.

Inspires Organizational Collaboration

Measurable performance of your DG System

Automated Data Governance Processes

Configurable to specific business requirements

APPROACH

Implementing COMPASS allows an organization to accelerate the establishment of a Data Governance program regardless of scale. Our approach allows for the Planning, Implementing, and Deploying of a data governance management system. Designed to be integrated with any organization's data development, operations structure, and application landscape, that will provide the desired outcome while reducing time and costs.

WHY COMPASS

COMPASS drives strategic value, by providing a coherent and unified data governance management system that is adaptable to the organizations present and future needs. Designed to deliver optimal efficiency in deployment, operations and business performance.

Feature	Functionality
Content	Charter, Policies, Standards, Processes Templates, Measures and Metrics
RACI	Organizational Role definitions and assignments
Intelligent Automation	COMPASS provides automated workflows delivered at scale
Table Driven Functionality	Out of the box, Role based UI, Multi-Language, Enterprise Security and Compliance combined with Business Efficiency

3 Key Organizational benefits of COMPASS adoption

- ✓ Quickly maximizes your investment in a Data Governance solution
- ✓ Minimizes cost due to comprehensive pre-built COMPASS System, saving months of effort
- ✓ Provides an essential framework for the rapid deployment, operation and analytics of your strategic DG Program for improving business performance
